

# Planned Activity Report

## WHAT CRITICAL INFORMATION CAN YOU PROVIDE?

**\*Status:** Gray-Ended  
**Activity No:**  
**Activity Type:** Exercise  
**Location Name:** Statewide  
**(Brief Description)**  
**\*Activity Name:** 2007 ARRL Simulated Emergency Test  
**Related Event:** No Related Events  
**Related Action:** No Related Action Requests  
**Plans:**

## SITUATION SUMMARY

### 10/06/2007 at 21:22 EDT John McDonough-Federal Government

SEOC activity completed at 1530. Additional traffic continued on normal HF channels and digital channels.

### 10/06/2007 at 12:29 EDT William Sholten-County of Benzie

W8BNZ completed SET, successful communications established at all target sites. Currently participating in hot wash at EOC. Will be terminating exercise shortly.

### 10/06/2007 at 09:54 EDT SEOC RACES--State Emergency Operations Center-

SEOC operational, no packet at this time

### 10/03/2007 at 11:22 EDT John McDonough-Federal Government

On the weekend of October 6-7, 2007, radio amateurs nationwide will conduct the annual simulated emergency test. RACES members plan to operate the state EOC from 10 AM to 3:30 PM.

County ARES/RACES groups will develop their own scenario, but they are expected to pass at least two pieces of record traffic. The first will be to their local VHF net. These VHF nets will then send representatives to the HF nets for relay to the SEOC. The second piece of traffic is from the county to the section manager via the statewide packet system.

In addition, US Army Mars is expected to generate some traffic which will be passed to the VHF nets. Emergency Management Ontario is also expected to generate some traffic.

The web site shown under "attachments" contains details of net times, frequencies, and other information.

## WHO'S IN CHARGE?

**Lead Agency:** Amateur Radio Emergency Services (ARES)  
**Contact:** John J. McDonough, WB8RCR, 989-430-4855

# Agency Situation Report

## WHAT IS THE OVERALL SITUATION?

**\*Agency:** Amateur Radio Emergency Services (ARES)  
**\*Jurisdiction:** Statewide  
**\*Operational Readiness:** Green-Normal Operations  
**City:**  
**County:**

**Geographic Area:**  
 (Region, District, Campus,  
 etc)

**State:** MI

**Related Event/** A - 2007 ARRL Simulated Emergency Test  
**Incident/Activity:**

## SITUATION SUMMARY

10/06/2007 at 21:27 EDT John McDonough-Federal Government  
 Statewide Emergency Test. Operations at SEOC complete.

**Current** Communicate with EOCs statewide  
**Objectives:**

**Projected** - Need more CW ops statewide  
**Objectives:** - Need to relieve packet congestion ... either move SEOC  
 off 145.76, move others off 145.76, or add additional  
 frequencies between SEOC and nearby hamgates.  
 - Need standard packet system at SEOC or more trained  
 operators on existing system  
 - Need a plan to move traffic to the SEOC over VHF  
 phone. Will require cooperation with nearby repeater(s)  
 and/or improving SEOC's VHF/UHF profile.

**Concerns** HF phone conditions varied from poor to unuseable during  
**Problems:** the test. Interestingly, CW conditions remained good  
 throughout.  
 Packet conditions were poor at the beginning of the  
 exercise due to excessive traffic on channel. As traffic  
 eased, connections became reliable. Unlike HF where  
 there was a range of conditions, packet conditions were  
 unuseable initially, then suddenly switched to stable.  
 Some nets indicated they would move traffic to SEOC via  
 VHF phone, but no such traffic materialized. SEOC can  
 only reach a few nearby repeaters. There was no schedule  
 for VHF phone nets during SEOC operation.

## WHAT IS YOUR ACTIVATION STATUS?

**OP Center Activated:** No  
 None

## WHAT ARE YOUR CAPABILITIES?

Availability: Refers to the percentage of resources on hand

**Related Event/ Incident/Activity:** A - 2007 ARRL Simulated Emergency Test  
**Date/Time:** 10/06/2007 at 16:42 EDT  
**\*Subject:** ARRL SET Follow Up - From Jim Davis - KC8NTE  
**Log Entry:** Northern Michigan Amateur Radio Emergency Services Organization in Otsego County is standing down with its SET operations.

Running E-Team via dialup requires a huge amount of patience!

Was not able to associate duty logs with ARRL SET Activity in E- Team.(select button returned blank page with Netscape Navigator ver 7.2)

Was able to associate duty logs using Internet Explorer.

Bands on 80 meters were unusable in Northern Michigan, 40 meters worked well most of the time.

SEOC had a nice signal into Otsego County.

Good Job by All!!!

When All Else Fails - " Amateur Radio " will get the message through.

## Duty Log Entry

**Name:** John J McDonough (*Autofill*)  
**\*Organization/Location:** Federal Government  
**\*Position:** State RACES Officer  
**\*Agency:** Radio Amateur Civil Emergency Service (RACES)  
**Shift:** Not Reported **Region/Office:** Statewide  
**Related Event/ Incident/Activity:** A - 2007 ARRL Simulated Emergency Test  
**Date/Time:** 10/02/2007 at 08:35 EDT  
**\*Subject:** SEOC Operators Identified  
**Log Entry:** Jim Harvey, KA8DDQ, called WB8RCR to advise him that KI8C and N8LLC would be prepared to operate from the SEOC.

Jim, and possibly another operator, will be operating MARS circuits from another location, and remotely checking the SEOC packet BBS. Although counties have not been asked to initiate digital traffic to the SEOC, it is likely some will want to test those circuits.
